DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, 2, 5, and 19-21, drawn to tablet, class 424, subclass 465.

Group II, claim(s) 1, 3, 27, and 28, drawn to capsule, class 424, subclass 451.

Group III, claim(s) 14, drawn to layer tablet, class 424, subclass 472.

Group IV, claim(s) 15-18, 22-26, 29, 30, and 39, drawn to tablet with coated pellets, class 424, subclass 462.

Group V, claim(s) 35, drawn to composition, class 514, subclass 428.

Group VI, claim(s) 36 and 37, drawn to blister pack, class 206, subclass 531.

2. The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: they do not share the same essential feature element(s) that define the "special technical feature" necessary to specify a contribution over the prior art. The tablet, capsule, pellets, coated pellets are known in the art and, therefore, cannot be

Art Unit: 1615

said to be the special technical feature which makes a contribution over the prior art. Thus, these claims lack the corresponding special technical feature(s) necessary to link them together to fulfill the Unity of Invention requirement.

Claims 4, 6-13, 31, 32, and 38 link(s) inventions of Group I and Group II. The restriction requirement among the linked inventions is subject to the nonallowance of the linking claim(s), claims 4, 6-13, and 31-34. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1615

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
